Subject: [External] Pipeline

CAUTION: External email. Do not click links or open attachments unless verified. Send all suspicious email as an attachment to report.spam@nc.gov.

Mr. Jeremy Tarr,

I believe you are the policy advisor to the governor on energy and environment. I am bringing to your attention that fossil fuel companies have the money and other resources to put pressure on you and the governor to give the green light for the construction of the pipeline.

We are the ordinary citizens who will be more than adversely impacted by such an occurrence not to mention the future of our descendants and of our air and water quality. The environment cannot protest, and we have to protest for it. We are the guardians of our planet and must be faithful stewards.

I am therefore pleading on behalf of Mother Earth to not let the corporations ride roughshod over her. There is already enough harm from past centuries of indiscriminate toxic pollution to our air, water, flora and fauna of the earth. The recent extreme climate changes are only going to get worse unless we now start to take steps to correct what has been done, let us not make this irreversible.

Please consider my request and I entrust you to give the governor the sound advice that many generations will thank you and him for.

Dr. Kim E. Koo
